Agenda

8:30 – 9:00 a.m. Registration

9:00 Welcome and Introduction

9:20 The Permit Process - *The where, when, and how of exemptions, general permits, and individuals.*

10:45 Break

11:00 Applying for a permit - *A practical exercise to avoid costly delays due to incomplete applications.*

12:00 Lunch

1:00 General Permit Standards - *A review of eligibility criteria for the general permit process.*

A workshop for contractors; consultants; state, municipal and county staff who will be working on projects located in and near waterways.

1:30 Grading and Pond Permits - *Determining the bank, controlling erosion (NR 151) and managing stormwater (NR 210)*

2:15 Break

2:30 Bridge and Culvert Permits - *Sizing, installation, and navigation requirements.*

3:15 Shoreline Stabilization Permits for Lakes and Flowages - *Choosing the appropriate stabilization method through the use of the Wind-Wave model and erosion intensity worksheet.*

4:30 Closing

Workshop Goals

This one day workshop will help participants:

- Understand the new permit process including the differences between exemptions, general permits and individual permits.
- Be able to identify specific location where activities would require more review and a different permit process (designated waters).
- Develop an understanding of how to use the specific rules and standards for regulated activities including grading, shoreline protection, bridges/culverts and the construction of ponds.
- Become knowledgeable with the materials and information on the DNR website.

Who Should Attend?

- Municipal, zoning, and county land and water staff who routinely design, oversee, or provide information on projects located in and near waterways.
- Consultants and contractors who design, construct, and oversee projects located in and near waterways.
- State agency staff responsible for implementing the waterway and wetland protection program.
